The lamp

The one living signal. It appears in the wordmark, the results bar and the status badge, and always shows what the engine is doing, alongside words.

Starting	Ready	Running	Done	Attention	Error
1.6 s fade	Off	1 Hz, 5 s max	One flash	Steady	Steady

In the results bar

Running 0:03 · **10** rows in **38** ms

Use it like this

01 Letters in the ink colour. The lamp in signal blue, or a status colour when it shows live engine state.

02 Never stretch, outline, re-letter or recolour the wordmark, and never add symbols to it.

03 One signal at a time: everything else stays grey, so the eye finds the light.

04 Show the working product. No stock photos, 3D renders or gradient blobs.
